

BERGAMONT
bicycles

Our work is governed by a passion to build really good but nevertheless affordable bikes. We can draw on 16 years of experience in the development of bikes which we build not just for a small group of specialist enthusiasts but for all those who want to avail themselves of the many benefits a bike can offer. Whether you're looking for a sports machine or an aid in everyday life, want to let off steam or simply get from A to B, our goal is always to develop the best bikes for every individual purpose. And naturally we are delighted that pursuing this philosophy has led to our being recognised in the world of professional bike sport as a top brand.

The basis for our bikes is a frame which has been thought out down to the last detail and which features a geometry specifically devised for the bike's intended use. Optimum equipment and a distinctive design complete the Bergamont concept, while our offer is rounded off by extremely attractive prices given our quality standards.

Environmental Benefits

- Zero emissions, zero fossil fuel usage
- No pollution, leading to cleaner air for us to breathe
- Smaller Carbon Footprint

Monetary Benefits

- Save money every time a drive is replaced by a ride
- A good bike costs about as much as a year's gym fees
- The bike lasts a lifetime, the gym demands money every year

Health & Fitness

- Use of bicycles for short every-day errands provides sufficient exercise for an average individual

Examples:

- A quick ride down to the neighborhood grocer
- Meet a friend for coffee
- Regular biking for fitness is known to be a sustainable, efficient and fun way to exercise

Fun

- Today's bikes have revolutionized the way we perceive riding
- Riding used to be a back breaking, onerous affair
- Now its fun, a truly rewarding experience
- Try it once and you'll surely want more
